Blockchain-based digital tokens are innovative financial instruments. The company emits tokens before launching the product in order to raise funds for its project. Despite the high investment attractiveness of tokens, one should consider the risks related to partial or total loss of investor's funds, which can be caused by technical, regulatory, political, market or financial factors. Zeonis platform doesn't take responsibility for any financial losses incurred by token users. Buying, selling, exchanging and owning operations are done at your own risk.

MISSION AND STRATEGY

MISSION:

- Speed up the introduction and popularization of NFT tokens as an instrument of owning digital copyright works.
- Ensure the possibility to exchange the token for any other cryptocurrency or fiat money.
- Protect author's rights using blockchain technology.
- Get maximum profit for both authors and investors.

STRATEGY:

Zeonis platform is created for working with NFT tokens which are copyrighted, non-fungible digital units. Each token is unique and in short supply. The NFT unit can be sold, bought, exchanged or saved. In the future perspective, most of them will grow in value in respect to fiat money and other cryptocurrencies. ZES is the internal token of Zeonis ecosystem.

NFT technological abilities make it possible to digitize author's rights and confirm ownership of digital assets. They are mostly used to deal with computer art, online games, paintings, music, and other things.

The key mission of the platform is to popularize digital art among mass-market customers using non-fungible tokens technology and, at the same time, facilitate exchange operations between users without applying to the third parties for assistance. This will eliminate unnecessary expenditures and also increase the speed and convenience of the transactions.

The popularity of the NFT protocol has immensely grown within a short time since its introduction. It's due to the fact that not only private users but also giant companies like Alibaba, Visa and others, are interested in it.

HOW ZEONIS EARNS MONEY

Zeonis is a new promising platform focused not only on its own development but also on helping authors with the promotion of their projects. Thanks to such cooperation, there is an ongoing active process of attracting funds from investors and users. With the increase in the number of participants and growth of the platform's reputation, the total profit also grows.

The team of Zeonis specialists work directly with the authors, checking their products for authenticity. They study the works and authors, analyze the perspectives and predict the future price. One should consider the fact that authors' authentic works grow in price with time, thus helping to increase their attractiveness for NFT holders.

ZES TOKENOMICS

Zeonis ecosystem operates its own ZES token, it being the platform's internal currency. With the growth of popularity, the token's value will also increase. In the future, it is planned to list the token on large cryptocurrency exchanges, which will increase its liquidity and price.

TOKEN DESCRIPTION

Total issue:

500 000 ZES

Price at time of issue:

0.5 USD

Average price (planned):

500 USD

TOKEN DISTRIBUTION

Liquidity pool:

50 000 ZES

Developers:

100 000 ZES

Reserve:

200 000 ZES

Investment in development:

150 000 ZES

Tokens can be kept, received or sent by using any crypto wallets supporting the Binance Smart Chain (BSC) protocol and cryptocurrency exchanges where ZES is listed. Most of the funds should be kept in cold storage wallets for security purposes.

SECURITY AND ANTI-FRAUD MEASURES

The NFT space is full of scams, including various fraud projects. Dishonest users often claim authorship of other people's creations. Zeonis team specialists thoroughly check all works and deal directly with the authors to exclude the possibility of fake copies.

The electronic platform based on Binance Smart Chain (BSC) guarantees security and unique character of each transaction. All transfers are recorded in the blockchain where any changes or manipulations are impossible. Each copy is duplicated between users. In case if most of the servers get disconnected, the copy will remain saved on those servers which are connected to the network.

The site's operations are protected by SSL technology combined with a multi-layered Firewall, this providing a maximum security to any transactions between the user and the company. Access to all functions is available 24/7 and technical support works in the same regime.

INVESTMENT PROJECTS

Zeonis attracts investor funds in order to further successfully develop the platform and support promising authors. It's beneficial to all parties. Investors get good revenues, the platform develops upon receiving new funds, and authors get more opportunities to implement their ideas. Any person can take part in it and choose one of the 4 offered investment programs. The sum of the revenues depends on the sum of invested funds: the bigger is the investment, the higher is the profit.

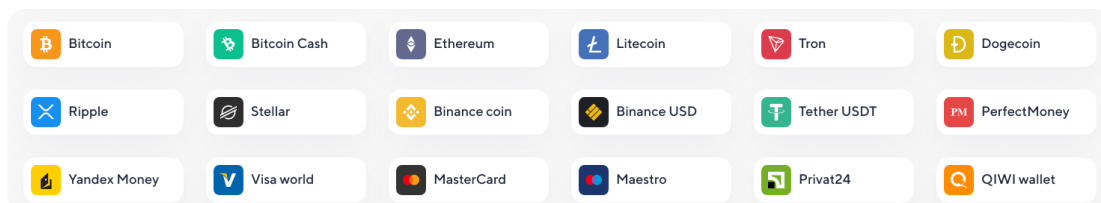

ADVANTAGES OF INVESTING IN THE PLATFORM:

Simplicity of participation in the program.
Minimum deposit: **5 USD**.
High profitability from **2.22% to 4.44% per day**.
Different investment programs: **4**
Investment period: **100 days**.

In addition to awarded revenues, the token itself will also increase in price with the growth and development of the platform. It will also help increase the investor's capital. An increase in liquidity on the exchange stirs interest in active traders who make money on differences in exchange rates.

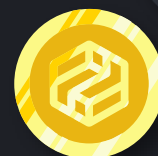

YOU CAN REPLENISH THE DEPOSIT VIA:

The list of payment systems the platform cooperates with is constantly expanding.

TOKEN USAGE

Increased income from
the company's tariff
plans

Increase in income from
the affiliate program

token

Drawing unique gifts
among ZES holders

Reduction of
withdrawal fees

PARTNERSHIP PROGRAM

For the successful development of Zeonis, it is necessary to popularize it and spread the information to potential users. Existing members can attract new users by sharing information about the prospects and opportunities of the NFT platform. Rewards will be given for attracting new users.

13%
23,5

Zeonis offers 4 types of partnership programs with rewards varying from 13 to 23.5%. Each time the attracted partner replenishes the deposit, the member who has brought him to the platform will be granted a reward according to the selected partnership program.

Partnership program participants receive payments from a special fund. Due to this fact, the profitability rate does not change for any of the participants.

TO PARTICIPATE YOU NEED:

BOUNTY PROGRAM

Users having profiles on social networks can help develop and promote the platform and be rewarded for doing this by tokens. Anyone having a trusted page on social networks such as Twitter, Facebook and YouTube can participate in the program. Just make a post about Zeonis NFT platform on your page and receive a reward for it.

THERE ARE MINIMAL REQUIREMENTS FOR SOCIAL MEDIA PROFILES THAT ARE ALLOWED TO PARTICIPATE IN THE BOUNTY PROGRAM:

- ✓ The page or channel must be created no less than 30 days ago.
- ✓ Information about the platform must be available at least 7 days after publication.
- ✓ Repost of the publication must be made by the followers.

COMPANY LEGAL ADDRESS

- 📍 233 Castlereagh St, Sydney NSW 200, Australia
- 📄 Registration number: 652 982 020
- 👤 Director: Ralf Hopkins

REGULATION IN SOME INDIVIDUAL COUNTRIES

Some countries or regions can restrict or even block access to Zeonis resources. It can happen due to various reasons which are beyond the platform's influence. Make sure to consider this fact when working with the platform. Relevant information concerning possible problems can be found on the official pages on social networks.
